

We define our efforts to protect both the environment as well as the well-being of our employees and to develop ourselves economically as environmental policy.

This environmental policy applies for:

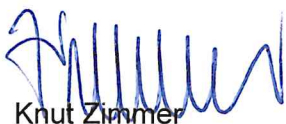

- Feintool International Holding AG, Lyss (CH) as well as all environmentally-certified Feintool Group companies according to page no. 2 of the annex.

Our EMS is organized according to ISO 14001 and is integrated into the management system. Its usefulness and effectiveness are checked by means of periodic audits and the annual management review.

- We promote our employee's environmental awareness through targeted training
- All processes are periodically reviewed and improved according to ecological criteria.
- By continually improving our production processes, we minimize the use of resources and thus reduce emissions and waste
- We comply with the applicable laws and regulations and binding commitments and operate a preventive safety organization with the aim of protecting employees and the environment
- When selecting our suppliers, environmentally-relevant criteria are also applied, which are also taken into account during supplier development.
