

FEINTOOL APP FEINRUBERT

Test the fineblanking quality with your smartphone

The FEINrubert free mobile app from Feintool allows you to show the straight cut ratio of a fineblanked component precisely.

FEINrubert

The benefits of fineblanking technology can now be demonstrated on a smartphone using the Feintool FEINrubert app. Simply photograph the fineblanked surface with the smartphone camera, and with just a few settings, you are provided with information on the straight cut ratio.

FEINrubert was jointly developed by Feintool and Jiaotong University in Shanghai. The app is a valuable and practical aid for you for inspecting individual components during production. Comprehensive background information on fineblanking round off the functions of the app.

What FEINrubert offers

- ▶ You can define individual areas and measure their straight cut
- ▶ Images can be compared with stored reference results
- ▶ Cracks in your parts can be compared with images of standard cracks provided by Feintool
