

TOOL AND DIE MAKER

An affinity for technical detail

Work as a tool and die maker specializing in blanking technology

- ▶ Produce individual components from a variety of materials using tools and machines
- ▶ Integrate components and assemblies to create tools, instruments, devices or forms
- ▶ Operate machinery with numerical control
- ▶ Apply technical documentation and use information and communication systems
- ▶ Plan, coordinate, test and optimize working procedures, assess and document results
- ▶ Carry out maintenance measures

What the training involves

- ▶ 1st year of training: manual and machine-based training in the tool room, including filing, grinding and turning. This part of the apprenticeship is also when the apprentices are introduced to measuring methods and attending a local university taking classes on applied theories of metalworking.
- ▶ 2nd year of training: deciding whether the apprentice is more affluent with CNC machining or tool and die work. Each apprentice starts a transition into elected field while still attending the university.
- ▶ 3rd and 4th year of training: honing skills in elected field. The CNC machinist is working on the machines with skilled operators and the tool makers are working under the direction of veteran tool makers.

What we are looking for

- ▶ Team-players with good communication skills
- ▶ Quality-driven employees
- ▶ Reliability
- ▶ Thorough work ethic
- ▶ Continuing education
- ▶ Conceptual thinking and visualization
- ▶ Good mechanical ability and understanding
- ▶ Dedicated to the overall advancement of the company

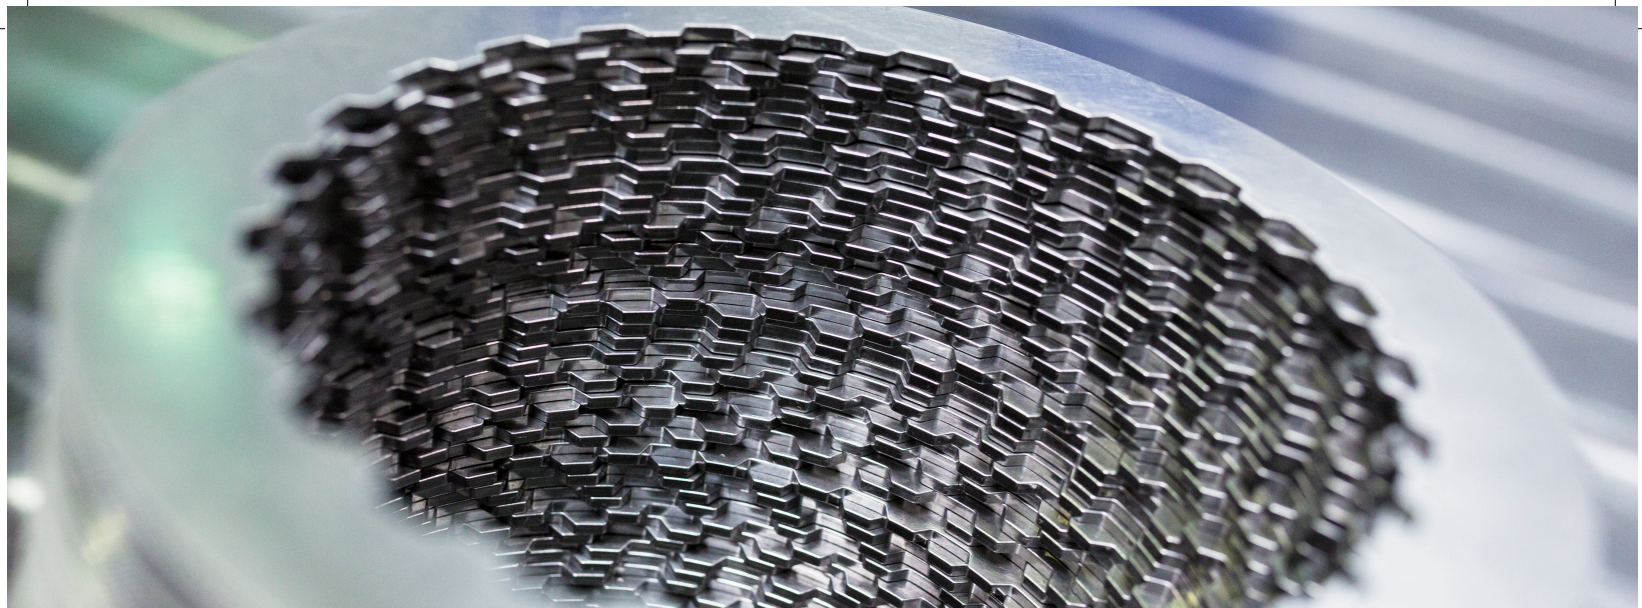

Contact

Are you motivated and eager to learn? Apply for an internship now, or send us your application with CV and references from your last two jobs by post or e-mail (PDF attachments not larger than 3 MB). Please also enclose a one-page letter explaining why you think you are the right person to train for this career. Then maybe you will soon be one of Feintool's successful trainees too!

The training team looks forward to receiving your application.

TRAINING AT FEINTOOL CINCINNATI, INC.

The first step today – for tomorrow's career

Vocational training at Feintool attaches great importance to a good balance between theory and practice. Qualified instructors will mentor you throughout your training period. This ensures you get a sound, high-quality grounding in your future career.

Opportunities at Feintool Cincinnati, Inc.

- ▶ Learn different vocations in a high-tech company that is passionate about quality, precision and reliability
- ▶ Independence and responsibility
- ▶ Mentoring by motivated, experienced and capable instructors
- ▶ High technical and quality standards
- ▶ Work in a highly regarded, globally operating supplier to the automotive industry
- ▶ Upon graduation of the apprenticeship program, full time positions in a promising career with excellent benefits and competitive pay are available for graduates
- ▶ Opportunity to work abroad at other Feintool production sites

Cooperation with various professional associations

- ▶ Great Oaks for high school students (11th and 12th graders)
- ▶ Great Oaks Career Campus, Ivy Tech Community College and Butler Tech to learn basic machine and engineering concepts
- ▶ Cincinnati and Sinclair State University: for students to meet their technical instruction requirements (576 hours of structured classroom lecture) for the apprenticeship program

Your gateway to a future with Feintool

- ▶ Get support at any time from qualified instructors and experienced trainees
- ▶ Continue your education during your apprenticeship at a local university; which is reimbursed by Feintool after successfully completing the class.

Feintool is the world's leading technology group specializing in the development of fineblanking systems and the production of ready-to-install fineblanking and forming components, notably for the automotive industry. With its locations in Europe, Japan, China and the USA, Feintool Group is represented in the world's major automotive markets. Headquartered in Lyss, Switzerland, the Group has a headcount of just under 2,000. At its various locations, Feintool provides training at any given time for about 80 young people in a number of skills.
