Confirmation to implement Import restrictions on Iron and steel

Dear Customers and Business Partners,

Feintool is committed to fully support and implement EU restrictions for its own business activities and across its business partner network.

The latest sanctions package of the EU imposed towards Russia, the EU 833/2014 law and its article 3g and the amendments, particularly Annex XVII to EU 833/2014, is foreseen the extended import ban on steel products, raw material or services from that country, or third countries, should they have imported such goods originated in Russia. Similar applies for Belarus according to article 1q of EU 765/2006.

Feintool confirms that no raw materials, steel products or services originating from Russia/Belarus are used or contained within the products we produce and sell to our customers. A confirmation in the same manner has been provided to us by our suppliers.

Any further developments of the EU regulations with regard to these sanctions are being followed by us and we ensure our customers and partners, to adapt and implement those as well.

Kind regards

Feintool System Parts Sachsenheim GmbH
