

**Leveraging the green energy
opportunity.**

Feintool Group Investor Presentation

FEINTOOL AT A GLANCE

A global technology group focusing on high-end precision parts for e-mobility, industrial applications as well as green energy production, storage and use

No. 1

in fineblanking¹ and forming technology²

1 bn.

CHF incoming orders per year

No. 2

in e-lamination stamping²

861 m.

CHF in sales 2022

3300

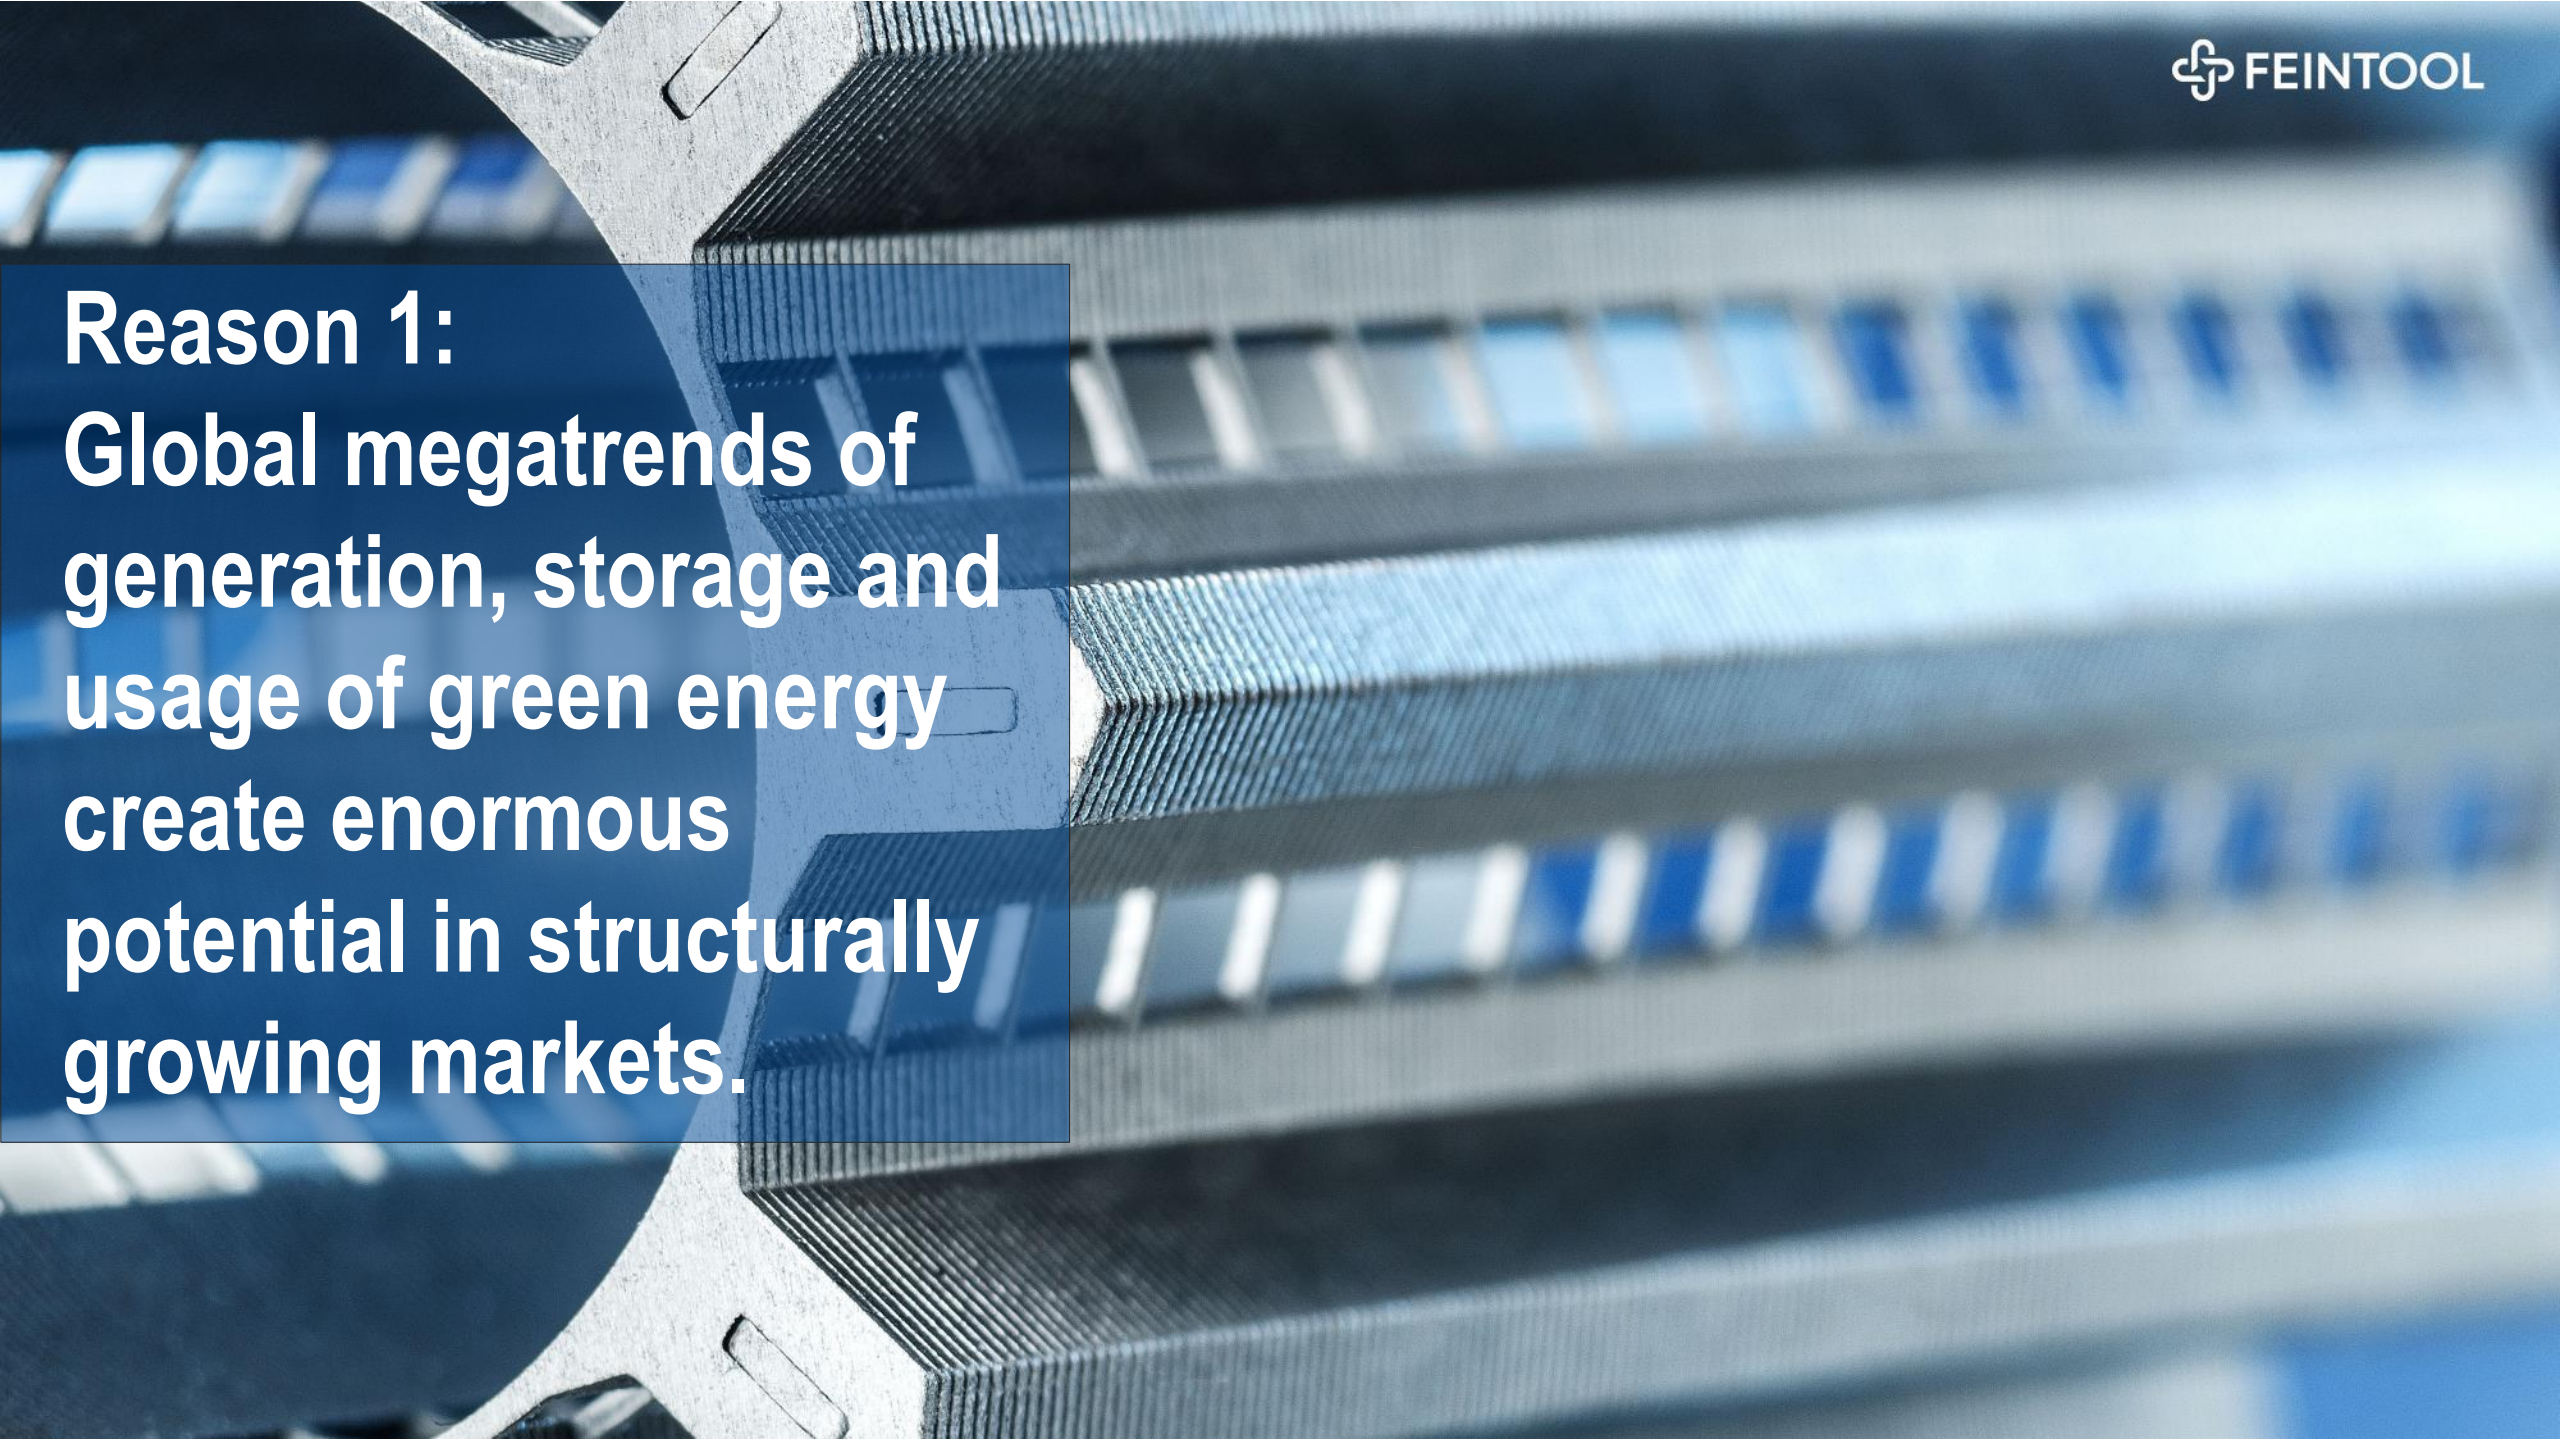

employees in 17 locations

¹ Globally, ² in Europe

SIX REASONS TO INVEST

Leveraging the green energy opportunity

1. Global megatrends of generation, storage and usage of green energy create enormous potential in structurally growing markets
2. Feintool business portfolio with clear focus on high-end series parts based on three core technologies is geared towards these megatrends
3. Proven core technologies to be applied in promising new application areas
4. Customer-centric value proposition ensures customer loyalty and builds barriers to entry
5. Transformation towards a pure-play manufacturer enables capital-light production model with reduced complexity
6. Growth strategy to reach global penetration with leading position in home markets as jumping-off point

The background of the slide is a close-up, high-contrast photograph of several interlocking metal gears. The gears are arranged in a way that creates a strong sense of depth and mechanical complexity, with light reflecting off the metallic surfaces and casting shadows in the teeth of the gears.

Reason 1:
Global megatrends of
generation, storage and
usage of green energy
create enormous
potential in structurally
growing markets.

REASON 1

MEGATRENDS OF GREEN ENERGY

Green energy production

Rotors and Stators for Wind and Hydro Power Generators

Green energy storage

Elements for electrolyzers, Fuel cells and batteries

Green energy use

Elements for drives in vehicles, heat pumps, industrial application

REASON 1

GLOBAL CAR PRODUCTION

Transformation towards electric vehicles creates a structurally growing market.

Number of vehicles produced up to 3.5 t gross weight, worldwide

- ▶ Stable growth in car production, returning to prepandemic levels in 2025: CAGR +1.7% (2023 – 2030)
- ▶ Strong trend towards fully electric vehicles: CAGR +21% (2023 – 2030)
- ▶ Almost one in two vehicles produced worldwide will be fully electric in 2030

Source: S&P 6/2023

REASON 1

INDUSTRIAL APPLICATION MARKET

Increasing demand for electric motors in industrial applications

- ▶ Increasing number of applications with electric drive, for example
 - Heat pumps
 - Automation in buildings and industry
 - Ventilation systems
 - Air conditioning units
- ▶ Increased demand for electric motors with better efficiency due to statutory regulations (replacement of older motors in existing plants) critical

Source: Arizton 2022

REASON 1

WIND ENERGY MARKET

Increasing demand for generators for wind turbines

- ▶ Wind turbines generate electricity by means of an electric motor (generator)
- ▶ Rising demand for wind turbines driven by numerous countries' requirements for the expansion of renewable power generation (replacement of fossil fuels, CO₂ targets in accordance with Paris climate agreement)
- ▶ Increasing expansion of wind power both offshore and onshore
- ▶ In addition to expansion: growing need to replace existing older wind turbines (repowering)

Source: Arizton 2022

Reason 2:
Feintool business portfolio with clear focus on high-end series parts based on three core technologies is geared towards these megatrends.

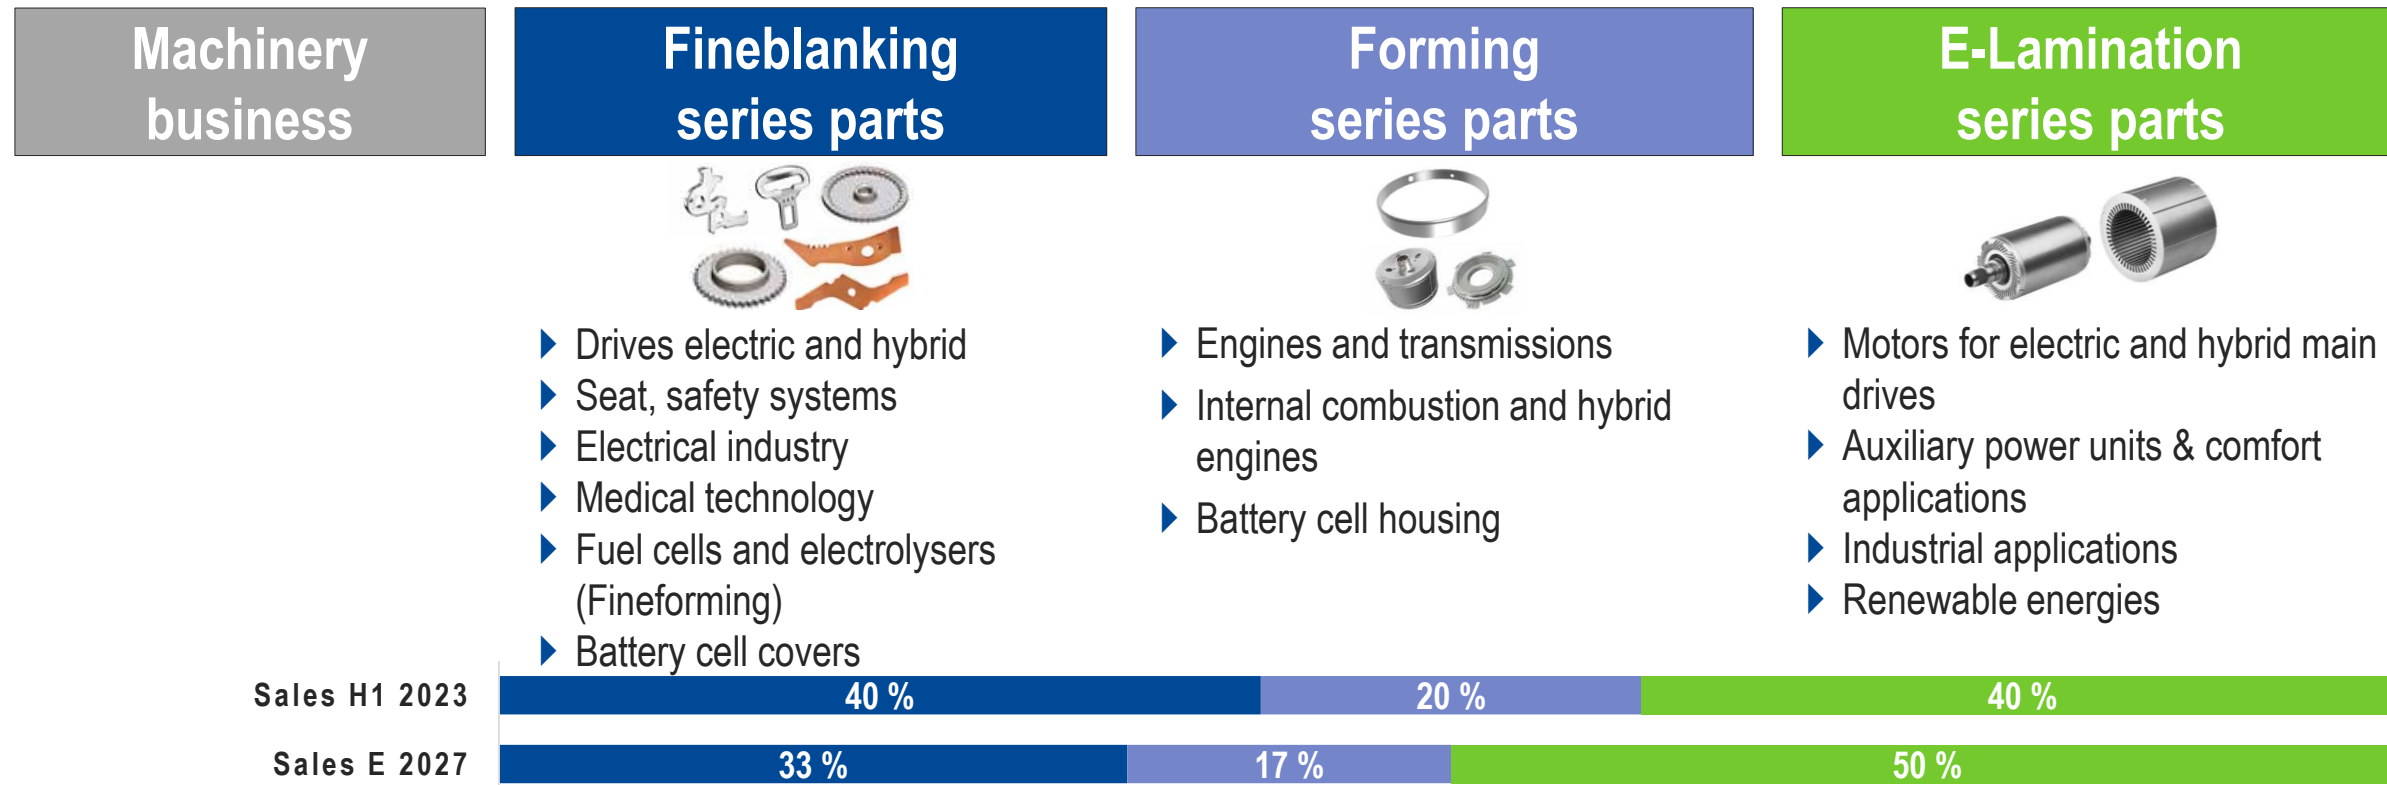

REASON 2

BUSINESS PORTFOLIO TRANSFORMED

Pure play manufacturer of high-end series parts based on three core technologies

Divested in 2023

Acquired in 2018/22

REASON 2

WIDE-RANGING PRODUCT PORTFOLIO

For automotive – especially e-mobility –, industrial and renewable energy markets.

Automotive

Industrial

Industrial Motors

- ▶ Linear motors
- ▶ Servo motors
- ▶ Drive motors

Air Movement

- ▶ Air blowers
- ▶ Ventilation
- ▶ Axial/radial ventilators

Pumps

- ▶ Centrifugal pumps
- ▶ Water pumps
- ▶ Dry pumps

Renewable Energy

Wind and Hydro Energy

- ▶ Wind turbines
- ▶ Hydro-energy turbines
- ▶ Electrolysers

REASON 2

FEINTOOL INCREASED EXPOSURE TO GREEN ENERGY-LINKED MARKETS

Transformation from ICE-dependent business to future-oriented business.

- ▶ In the last 5 years, ICE-related sales have been reduced from roughly 70% to 44%.
- ▶ In 2022, 55% of sales were generated in future-oriented businesses:
 - Stamping Motorcore: electric and hybrid main drives, auxiliary power units & comfort applications
 - Non-ICE: Seat, safety systems, brakes, etc.
 - Non-Automotive: industrial and renewable energy applications

**Reason 3:
Proven core
technologies to be
applied in promising
new application areas.**

REASON 3

NEW APPLICATIONS FOR FEINFORMING IN FUEL CELLS AND ELECTROLYSERS

FEINforming for the production of bipolar plates

FEINforming

Production of bipolar plates for:

FUEL CELLS

$H_2 \rightarrow \text{electrical energy}$

Mobile applications
Stationary applications

ELEKTROLYSEUR

Electrical energy $\rightarrow H_2$

Central large-scale systems
Decentralised systems (small and medium size)

- ▶ Feintool has the know-how for large-scale production of anodes and cathodes (FEINforming) for bipolar plates.
- ▶ Bipolar plates are the core of fuel cells but also of electrolyzers for the production of green hydrogen.
- ▶ Feintool has bundled its in-house expertise and also cooperates closely with the German company SITEC.
- ▶ Major contract from renowned fuel cell manufacturer in China won in July 2023.

REASON 3

DEMAND FOR FUEL CELLS AND ELECTROLYSERS WILL INCREASE STRONGLY

Combined markets for fuel cells and electrolyzers are expected to achieve +72% growth.

- ▶ Attractive market potential for fine forming for the production of bipolar plates.
- ▶ Market for electrolyzers will develop more strongly than that for fuel cells in the medium to long term.
- ▶ Large quantities of green hydrogen required for decarbonization in several industries (steel, cement, chemical industries ...).
- ▶ Estimation for electrolyzers: 1/3 of market volume for Feintool/SITEC achievable (due to plate size, etc.)

¹ Designs considered: Proton Exchange Membrane (PEM) and Solid Oxide (SO)

² Medium scenario: 240 GW installed electrolyser capacity in 2030 (see IEA, Irena ...)

REASON 3

NEW APPLICATIONS FOR FINEBLANKING AND FORMING IN BATTERIES

Battery market is estimated to achieve growth of +27%.

- ▶ Approx. 100 new battery factories (Giga Factories) under construction worldwide
- ▶ Demand for battery cell housings and covers growing strongly

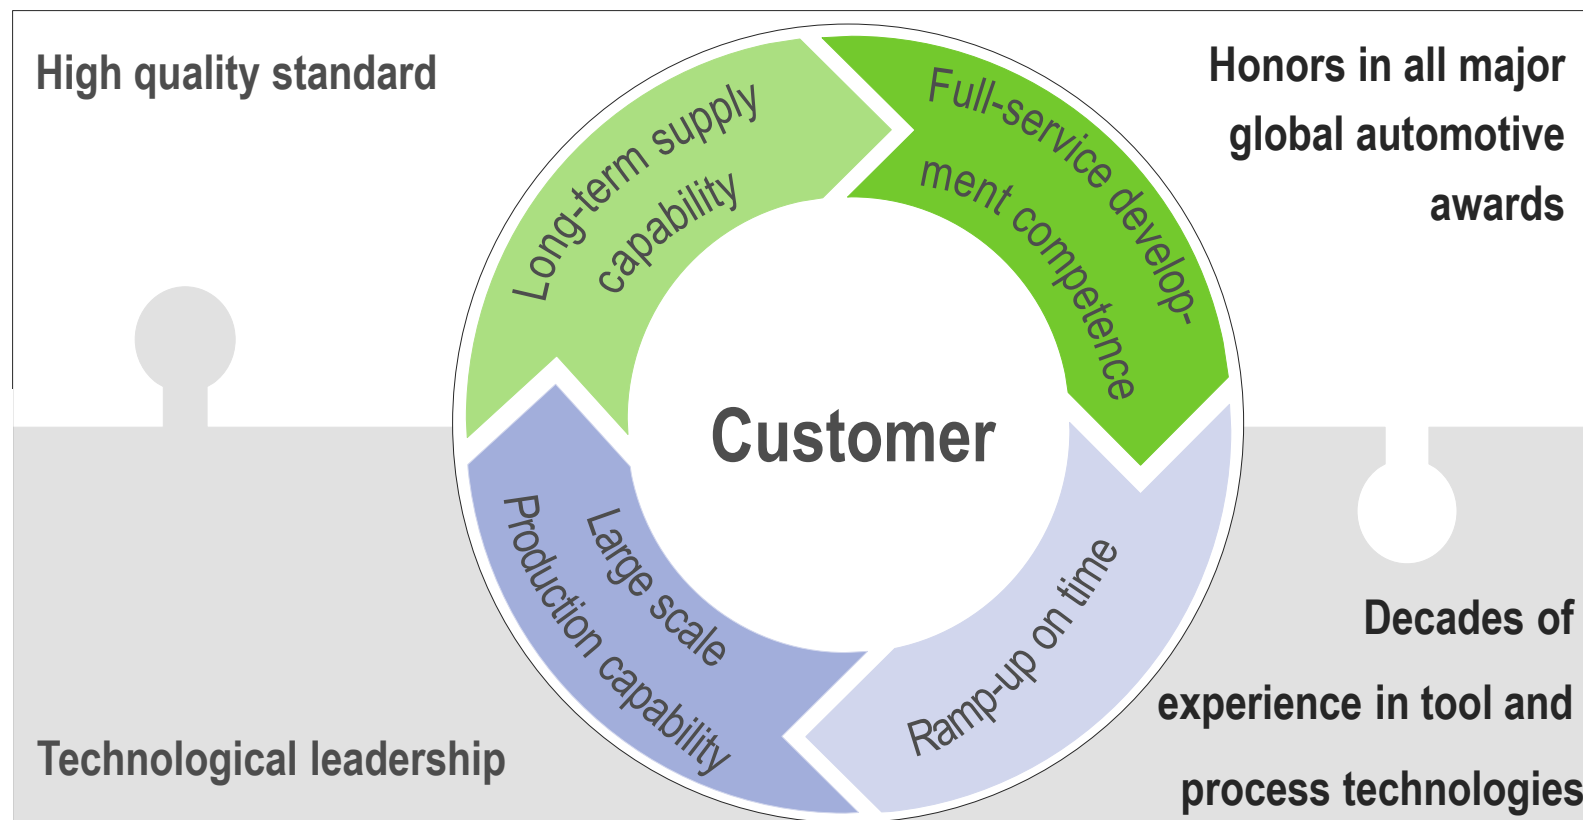

Source: McKinsey Battery Insight Demand Model, base case

**Reason 4:
Customer-centric value
proposition ensures
customer loyalty and
builds barriers to entry.**

REASON 4

FEINTOOL CREATES VALUE THROUGH EXPERTISE AND INNOVATION

And builds barriers to market entry for potential competitors.

- ▶ Technology leader for e-lamination stamping, forming and Fineblanking
- ▶ Entire process from design, prototyping, engineering, tooling, high-volume manufacturing
- ▶ Development partner of customers for drive concepts for e-mobility
- ▶ Only full-range supplier for precision components in high volumes
- ▶ Long-term, well-established customer relationships with all major OEM and Tier 1 (high switching costs for customers)

REASON 4

FEINTOOL CREATES VALUE THROUGH EXPERTISE AND INNOVATION

Strong strategic position - global customer reach with low concentration

Broad range of customers

- ▶ Aisin
- ▶ Audi
- ▶ BMW
- ▶ BorgWarner
- ▶ Bosch
- ▶ Daimler
- ▶ Dynax
- ▶ Ford
- ▶ Geely
- ▶ General Motors
- ▶ GKN
- ▶ Imasen
- ▶ Iwis
- ▶ Jungheinrich & Kion
- ▶ Lear
- ▶ Nio
- ▶ Porsche
- ▶ Siemens
- ▶ Somfy
- ▶ Stellantis
- ▶ Toyota Boshoku
- ▶ Volkswagen
- ▶ ZF

Low customer concentration

Reason 5:
Transformation towards
a pure-play
manufacturer enables
capital-light production
model with reduced
complexity.

REASON 5

PURE-PLAY MANUFACTURER WITH BETTER FINANCIAL PROFILE

Lower Capex/sales ratio, improved FCF and balance sheet and higher ROIC/ROCE.

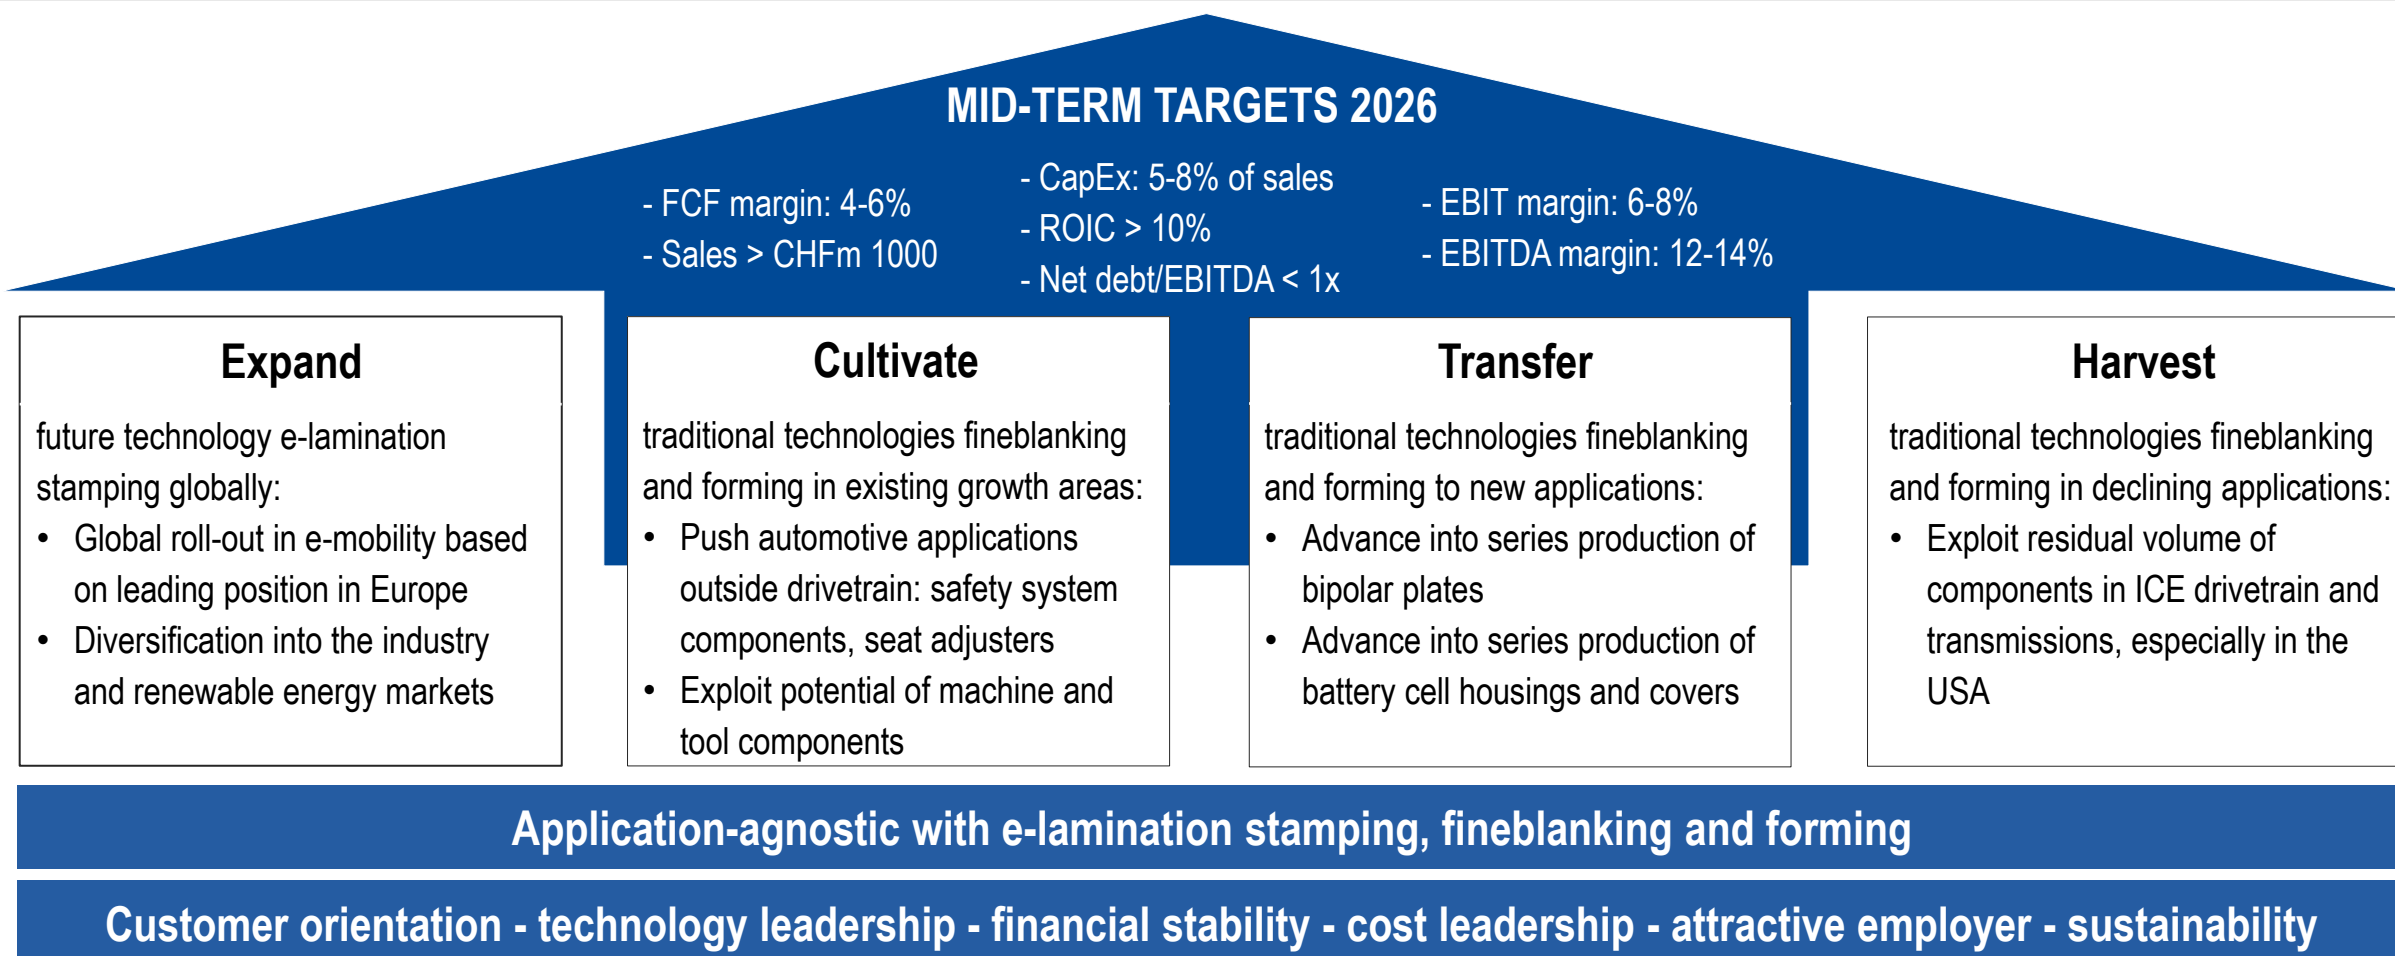

- ▶ Capex/sales ratio clearly differs between forming (1/1), fineblanking (0.7/1) and e-lamination (0.5/1).
- ▶ Lower upfront investments with a positive impact on FCF and liquidity/balance sheet quality.
- ▶ Comparable EBITDA margin profiles of the three technologies in combination with lower depreciation lead to significantly higher ROIC/ROCE for the e-lamination technology.

Reason 6:
Growth strategy to
reach global penetration
with leading position in
home markets as
jumping-off point.

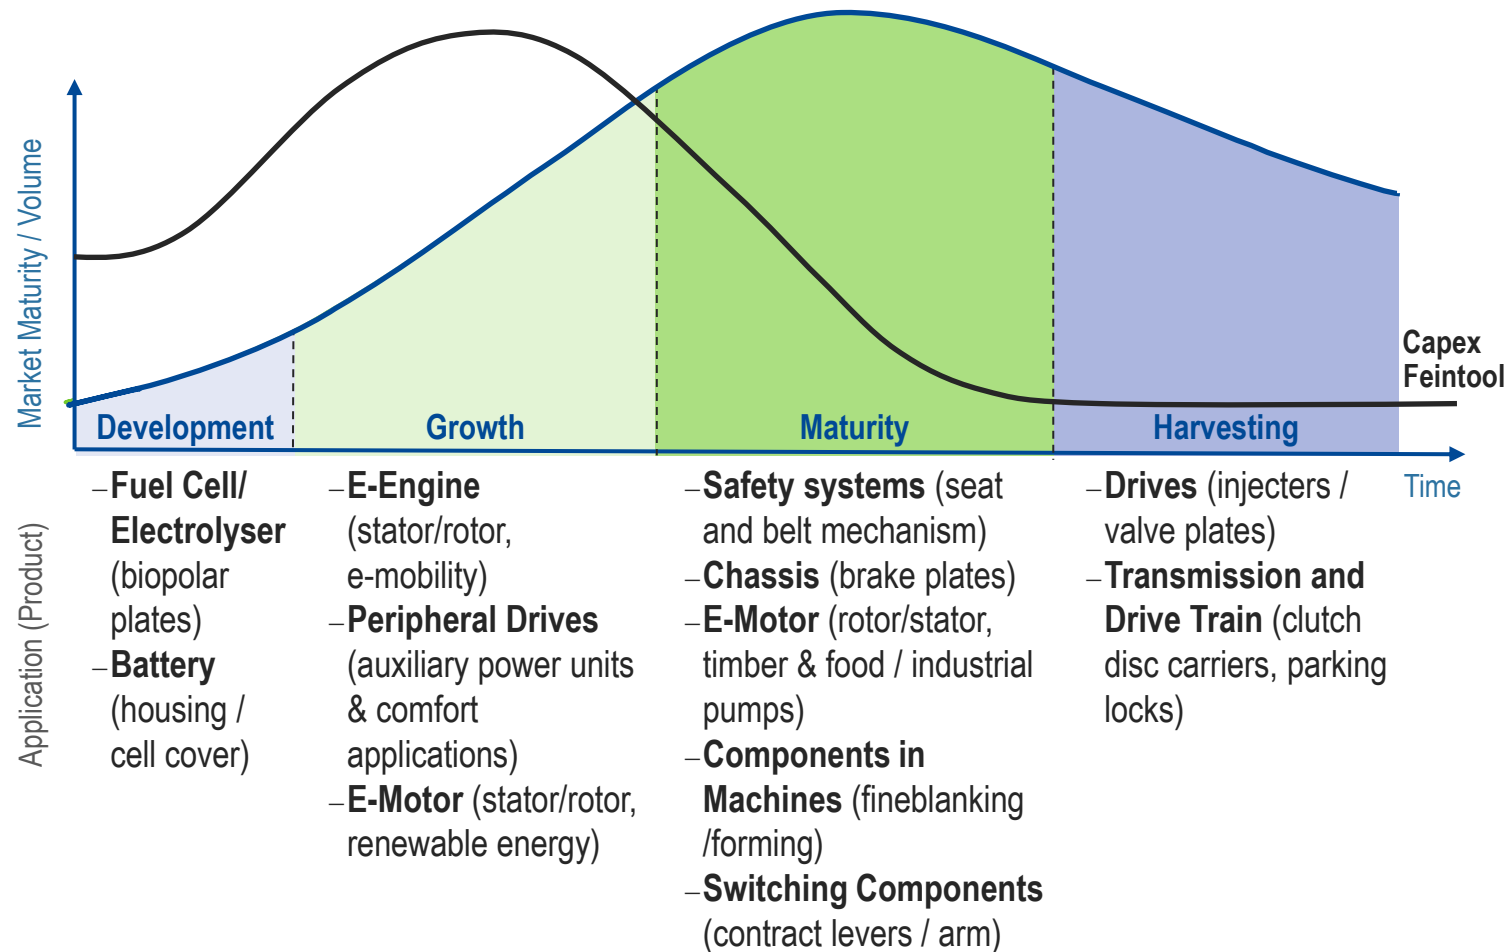

REASON 6

GROWTH STRATEGY

REASON 6

APPLICATION LIFECYCLE

- ▶ Most applications in mature high-volume phase of lifecycle.
- ▶ E-engine for e-mobility, peripheral drives and e-motor for renewable energy contribute substantially to sales, but still in growth phase.
- ▶ New applications fuel cell / electrolyser and battery currently emerging.
- ▶ ICE-applications as cash cow for coming years.

REASON 6

THE TRANSFORMATION TOWARDS GREEN ENERGY MARKETS CONTINUES

Feintool will further increase exposure to generation, storage and usage of green energy

- ▶ Feintool plans to further increase the share of the future-oriented businesses to approx. 75% until 2027
- ▶ More than 50% will be linked to green energy markets.
- ▶ Sales with components for electric and hybrid drives (Stamping Motorcore) are expected to triple to CHFm 300.
- ▶ Non-ICE and non-Automotive sales will continue to grow and reach approx. CHFm 500.
- ▶ Emerging new applications battery housing and cover as well as bipolar plates to reach approx. CHFm 100.

Appendix

FINANCIAL PROFILE/SUMMARY

in CHF Mio.	2022	2021	2020	2019
Sales	861.0	588.1	492.0	632.7
Operating EBITDA	85.7	85.6	53.2	67.7
Operating EBITDA Margin	10.0%	14.5%	10.8%	10.7%
Operating EBIT	26.7	34.5	3.0	18.9
Operating EBIT Margin	3.1%	5.9%	0.6%	3.0%
Net Debt	42.1	120.7	146.9	140.8
Net Debt/EBITDA	0.5	1.4	2.8	2.1
Total Common Equity	540.5	338.4	293.9	309.9
Equity ratio	59.1%	49.4%	43.4%	43.9%
CapEx	40.0	57.4	43.3	56.3
CapEx to Sales	4.6%	9.8%	8.8%	8.9%
Free Cashflow	-25.4	38.3	1.3	30.2

KEY DATA AND SHARE INFORMATION

Registered Office	3250 Lyss, Switzerland
Listing	SIX-Exchange
Reporting Standard:	International Financial Reporting Standard (IFRS)
ISIN:	CH0009320091
Ticker symbol (Bloomberg/Reuters):	FTON SW / FTON.S
Number of shares	14 744 526
Nominal Value	CHF 10.00
Share price (31.07.2023):	CHF 23.7
Dividend per share (2022):	CHF 0.34
Pay Out Ratio (2022):	23 %
Market capitalization (31.12.2022)	CHF 349 million
Average daily trading volume (08/22-07/23)	9.247 Shares or CHF 200.000
Significant shareholders (as of 31.12.2022):	Artemis Beteiligungen I AG & Michael Pieper (50.1 %), Geocent AG (9.7 %)
